25X1

1. The construction of a new barracks installation on the edge of the woods three km southwest of Tamasi (Y 5/B 29) was completed in the fall of 1949. In October 1950, the installation quartered Hungarian troops. An artillery unit with about 15 guns was seen leaving the installation about the middle of August 1950. Four of the guns had long barrels and were towed by prime movers. The remaining guns were towed by trucks which were occupied by about 20 soldiers each. A unit which left the installation on foot during the first half of October 1950 consisted of troops who were armed with submachine guns and rifles and organized into three sub-units. Source believed that the installation quartered an artillery and an infantry unit. All troops from the installation participated in field exercises conducted in the Puerged Station (Y 5/W 20)-Ozora (Y 5/B 15) area from 12 to 23 August 1950, in conjunction with mortar units which, according to an informant, had come from Tab (Y 5/W 00).
2. No Soviet troops were observed in the Tamasi area prior to October 1950.
